

## Encryption Product

### [Spread Spectrum Link](#)

The ML2.4 Spread Spectrum SHF Link can be used wherever a secure voice and data radio link must be simply and quickly set up. This is mainly for tactical deployment involving authorities and security personnel or for relief organisations in disaster situations as well as for the military.

### [Selective Call Test Unit SRTG-GA82](#)

This test unit is used to check radio signalling procedures in radio systems for servicing, commissioning or during development work and for radio monitoring.

### [Radio Operator Console FBT 126](#)

The FBT-126 Radio Operator Console serves as a system component for command control positions of a works management system having small, medium or large capacities. Applications include police and security organisations as well as fire departments or other users for remote control of stationary radio installations.

### [LINK ENCRYPTION](#)

Link Encryption SEU-8440 protects your communications over both existing and planned fixed connections. SEU-8440 is the right security solution in cases in which critical or even personal data have to be transported – for example, via LAN-to-LAN connections between branch offices and headquarters. With its 19-inch case, SEU-8440 fits easily into standardized equipment racks.

### [Lighthouse Remote Control LM-01](#)

LM-1 is modern telemetric device which is monitoring important values of the lighthouse system and in the case of the damage it is, automatically, sending SMS alarm messages to in advance scheduled numbers. It can be also phoned by GSM telephone and scan all values which it is controlling at the system. Values will be send back by SMS. It enables easier observation and increases working safety of the lighthouse.

### [Disk Encryption Software](#)

The most secure and versatile disk encryption software A commercially available full-disk encryption software application designed specifically to run transparently with Windows Vista/ XP/2000/2003.

### [USB Encryption](#)

256-bit AES encryption Mandatory security of all files Strong password authentication Lockdown mode after several incorrect password attempts Transfer speeds: 24MB/s Read 20MB/s Write

### [Hard Disk Encryption](#)

Ensure your company's Sensitive information remains fully secure at all times, whether it is on a laptop or desktop computer. Eclipt Corporate is a direct replacement for your computer's standard hard drive and is available factory-fitted or retrofitted to provide immediate protection for your data.

### **Hard Drive Encryption**

Eclipt Freedom is an external encrypted hard drive which has been developed to meet the portable data security needs of both the business sector and the government sector.

**Encryption Product | Radio Operator Console | Spread Spectrum Link | Selective call test unit**
