

Encryption Product

[Spread Spectrum Link](#)

The ML2.4 Spread Spectrum SHF Link can be used wherever a secure voice and data radio link must be simply and quickly set up. This is mainly for tactical deployment involving authorities and security personnel or for relief organisations in disaster situations as well as for the military.

[Selective Call Test Unit SRTG-GA82](#)

This test unit is used to check radio signalling procedures in radio systems for servicing, commissioning or during development

work and for
radio
monitoring.

**Radio
Operator
Console
FBT 126**

The FBT-126
Radio
Operator
Console
serves as a
